

Type I Diabetes? We Need Your Help!

SAVE LIVES

Diabetic Assistance Dogs

Eyes Ears Nose and Paws trains and places Diabetic Assistance Dogs. These dogs use their noses to alert their partners with diabetes when blood glucose has moved out of target ranges. A Diabetic Assistance Dog can also wake his partner and bring a medical kit, or alert someone else (even by phone!) if his partner is unresponsive.

Scent samples help us train our dogs.

Eyes Ears Nose and Paws is seeking volunteers of all ages who have Type I Diabetes to be Scent Sample Volunteers. Being a Scent Sample Volunteer is easy and your help is critical to our dogs' success! When you normally take a glucose reading, simply wipe a gauze pad over your skin and put it in a ziplock bag. The ziplock has a label where you record the glucose reading, date, and other information. Eyes Ears Nose and Paws provides the gauze pads and bags and collects the samples from you each week.

About Us: Eyes Ears Nose and Paw is a nonprofit organization located in Carrboro, NC, that trains and places assistance dogs. Our Service Dogs assist individuals with mobility impairments and our Diabetic Assistance Dogs promote the short and long term health of their human partners with diabetes. To volunteer, donate or learn more about our programs, contact us at
